

Version 33.8(100) Changes

- General changes

A huge number of internal changes have been made in this version of software in preparation for current and future needs. Some of the changes include removing old code for version 5.1 claims, increase in record sizes so more data can be stored, removal of no longer used variables, and increase in size of certain fields. Following is a short list of some of the changes.

1. In the patient record, the name field has been increased from 26 to 40 characters. The address fields have been increased from 26 characters per line to 30 characters per line. The city has been increased from 17 characters to 20 characters. **Note**, in some of the old programs such as dot matrix prescription label printing and label #16, not all of the data in these fields can be printed and will be truncated.
2. In the doctor record, the name field has been increased from 26 to 40 characters. The address fields have been increased from 26 characters per line to 30 characters per line. The city has been increased from 17 characters to 20 characters. The DEA suffix has been increased from 4 characters to 6 characters. **Note**, in some of the old programs such as dot matrix prescription label printing and label #16, not all of the data in these fields can be printed and will be truncated.
3. In the patient 3rd party record, the cardholder name field has been increased from 26 to 40 characters. **Note**, in some of the old programs such as dot matrix prescription label printing and label #16, not all of the data in these fields can be printed and will be truncated.
4. In the drug record, the eScript quantity qualifier is no longer used and has been removed.

- Label #16 and #17

Auxiliary label number 7 has had the second line of the patient address added.

- Controlled substance reports

Several internal changes were made to the Kansas report.
