

Version 33.8(101) changes

- **Controlled substance reports**

Washington controlled substance report has been updated to ASAP version 4.2.

- **Drug ordering**

This has been modified extensively to use a national standard called the 850 purchase order. A supplier file has also been added with numerous options and data elements. Call to see if your supplier can accept this.

- **Patient compliance report**

This is a new report for patient compliance on maintenance drugs. This program will give a report of prescriptions for maintenance drugs that have not been refilled on the day specified in the master file. You may set this program up to run automatically or run from the menu. Call for more details.

- **Auto-refills**

An option has been added to allow editing of auto-refills after a new prescription has been filled and the label has been printed.
